Abcourt Mines Inc. (ABI-V)

Abcourt intersects up to 4.1 g/t Au over 11 m in channel sampling on the former Cambior stripping area at Flordin.

On June 16, 2025, Abcourt report channel sampling results from the historical Cambior stripping area on its Flordin Property. The 100% owned Flordin Property is situated in the Lebel-sur-Quévillon area of the Québec, in the heart of the Abitibi. Recall on May 12, 2025, Abcourt had reported the latest assay results from its 2025 drilling campaign on Flordin. Hole FL-25-284 had intersected 3.7 g/t Au over 11 m, <3 metres from surface directly below the Cartwright stripping in the eastern end (see: https://www.linkedin.com/posts/eric-lemieux-9468715_quebec-abitibi-flordin-activity-7328525304329637888-sFjy?utm_source=share&utm_medium=member_desktop&rcm=ACoAAAEEcwYBYv9IQ3WrNxLu2IPkWSB479Ajztl).

Showing continuity: The most recent channel sampling results are from the former Cambior stripping and located immediately west of the 2024 Cartwright stripping (see: https://www.linkedin.com/pulse/abcourt-mines-inc-abi-v-prepares-new-stripping-drilling-eric-lemieux-psvde/?trackingId=JP8Gqh8JTfKJM1dlejDWUQ%3D%3D). This new phase of sampling made it possible to add 4 new channels each~20m in length on the old stripping done by Cambior at the end of the 1980s. The channels are spaced about 10m apart and a smaller one (No. 18) is ~5m long. The channels, 6 to 8 cm deep, intersect perpendicularly the mineralized zones, which are oriented E-W with a sub-vertical dip. A total of 87 m of new channel (175 samples) were completed and has allowed to link the historical Adam and Horse showings and extend the mineralization at surface over more than 300 m in length. The most significant intersection came from channel 19 which returned 4.1 g/t Au over 11 m including 12 g/t Au over 3.5 m. The mineralization is associated with significant shear and is composed of pyrite-silica-hematite-rich bands in zones with gossan-type surface alteration (weathering) (pyrite dissolution, yellow surface). This new channel phase suggests the mineralized zones extend at surface over > 300m in length. The historical mineralized zones (Horse and Adam) are spaced 1 to 5 m apart and the stripping phases carried out now permit to link these zones together, because the host rock (basalt), even with low pyrite mineralization, contains grades ranging from 100 ppb to more than 1 g/t Au. This potentially increases meaningfully the thickness of the mineralized zones defining a gold envelope of 300m long by 10m wide and >20m deep with an average grade of 5.5 g/t Au.

Potentially up next: The 2025 goals shall be to advance Cartwright-Flordin by initiating a 10,000m drill program in the Cartwright area; with drilling beneath the stripped area at -200m to confirm continuity at depth.

Pascal Hamelin, President et CEO commented: "*The new channels completed on the former Cambior stripping once again confirm the connection between the mineralized zones over thicknesses sometimes exceeding 10 metres and continuous over more than 300 metres in length. The areas remain open laterally to both east and west. Drilling last winter also confirms that the mineralized zones remain open at depth and laterally.*"

Board changes: Abcourt noted the appointment of Lise Kistabish, member of Abcourt Mines Board of Directors, as Executive Director of the Council of the Abitibiwinni First Nation. The Abitibiwinni First Nation Council represents the interests of almost 1070 Abitibiwinnik, nearly 600 living in the Anishinabe community of Pikogan. The Nation's name refers to Abitibi Lake, which means where waters divide. The new executive role of Lise Kistabish has obliged her to resign from the Abcourt Mines Board of Directors.

Pascal Hamelin, President et CEO stated: "*On behalf of my colleagues on the Board and myself, we sincerely thank you for helping Abcourt moving forward. We have greatly appreciated your sincerity and personal ethics in our various exchanges over the past few years. The Council of the Abitibiwinni First Nation is very fortunate to have you now on their executive team. Best of luck in your new projects. Secondly, activities related to the financing of the start-up of the Sleeping Giant project continue to progress well. We are working with our technical, legal, and financial partners to bring the project towards rapid development of gold production. The general environment is conducive to launching a high-grade gold project in a stable jurisdiction such as Canada, with well-established infrastructure and all the required government authorizations at Sleeping Giant*".

Table of the main stripping results

Channel number	CUMULATIVE ZONES	ZONE	Interval	Including	Metal Factor (Grade X Thickness)
Channel 4	5.2 g/t Au over 10 m	ADAM HORSE	0.9 g/t Au over 1 m 8.4 g/t Au over 6 m	44.8 g/t Au over 0.5 m	52
Channel 5			4.0 g/t Au over 6 m	18.9 g/t Au over 0.5 m	24
Channel 6			22.7 g/t Au over 7 m	161.9 g/t Au over 0.5 m	159
Channel 7			8.4 g/t Au over 7.5 m	33.9 g/t Au over 0.5 m	63
Channel 8	5.4 g/t Au over 10 m	ADAM HORSE	3 g/t Au over 3.5 m 7.2 g/t Au over 5.5 m	11.8 g/t Au 0.5 m 38.1 g/t Au over 0.5 m	54
Channel 9	2.9 g/t Au over 14.5 m	ADAM HORSE	0.4 g/t Au over 6 m 7.8 g/t Au over 5 m	1.5 g/t Au over 0.5 m 39.2 g/t Au over 0.5 m	42
Channel 10	4.3 g/t Au over 8 m	ADAM HORSE	0.7 g/t Au over 1.5 m 7.4 g/t Au over 4.5 m	1.3 g/t Au over 0.5 m 32.6 g/t Au over 0.5 m	35
Channel 11	10.4 g/t Au over 12 m	ADAM HORSE LITTLE JOE	1.5 g/t Au over 2 m 18.5 g/t Au over 6.5 m 1.33 g/t Au over 0.5 m	2.9 g/t Au over 0.5 m 29 g/t Au over 4 m	124
Channel 12	4.5 g/t Au over 9.5 m	ADAM HORSE LITTLE JOE	0.5 g/t Au over 2 m 8.7 g/t Au over 5 m 0.391 g/t Au over 0.5 m	32.9 g/t Au over 0.5 m	45
Channel 13	2.9 g/t Au over 11.5 m	NEW ZONE ADAM HORSE	2.7 g/t Au over 0.5 m 0.5 g/t Au over 2.5 m 6.7 g/t Au over 5 m	1.4 g/t Au over 0.5 m 25.5 g/t Au over 1 m	34
Channel 14	3.4 g/t Au over 12 m	NEW ZONE ADAM HORSE	2.7 g/t Au over 1.5 m 1.2 g/t Au over 2.5 m 6.7 g/t Au over 5 m	3.7 g/t Au over 0.5 m 4.7 g/t Au over 0.5 m 27.2 g/t Au over 0.5 m	41
Channel 15	2.8 g/t Au over 12 m	ADAM HORSE	0.8 g/t Au over 3.5 m 8.5 g/t Au over 3.5 m	2 g/t Au over 0.5 m 30.6 g/t Au over 0.5 m	34
Channel 16	1.9 g/t Au over 8.5 m	ADAM HORSE	1.1 g/t Au over 1 m 11.2 g/t Au over 1 m		16
Channel 17	2.5 g/t Au over 8.5 m	ADAM HORSE	1.0 g/t Au over 1.5 m 6.9 g/t Au over 2.5 m		21
Channel 18		HORSE	16.5 g/t Au over 2 m		
Channel 19	4.1 g/t Au over 11 m	ADAM HORSE	3.1 g/t Au over 0.5 m 12 g/t Au over 3.5 m		45.1
Channel 20	3.6 g/t Au over 8.5 m	ADAM HORSE	1.3 g/t Au over 1 m 18.5 g/t Au over 1.5 m		30.6
Channel 20B		ADAM	3.7 g/t Au over 1 m		
Channel 20C		HORSE	10 g/t Au over 2 m		
				Average	51.26
